**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-45, drawn to an animal pen system, classified in class 119, subclass 502.
- II. Claims 47-50, drawn to a method for deploying a collapsible animal pen, classified in class 119, subclass 513.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case invention I can be made by a materially different process, it does not require that the pen wall be attached to the support wall but merely that it is retained in place by the support wall. The means for retaining does not necessarily require the pen wall to be attached to the support wall.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
